Overview

About Rabbit Wallet

Rabbit Wallet is a multi-utility decentralized wallet application (Defi Wallet) that facilitates the storage and management of crypto-assets for users, granting them complete control over their assets containing security characters. In addition, the Rabbit wallet allows users to connect DApps, and the wallet's integrated utilities help users experience and earn money in the Defi world.

Value Proposition

Security & Private

Security is a fundamental requirement for asset management. Wallets can only be accessed by their owners. Rabbit Wallet evolves daily to protect user assets from outside malicious attacks and does not collect any personal information about its users

Multi-utility & Ease

Multi-utility enhances user experience when using favorite decentralized applications (DApps), entertainment and monetization right on Rabbit wallet without moving to another application in the easiest way for users
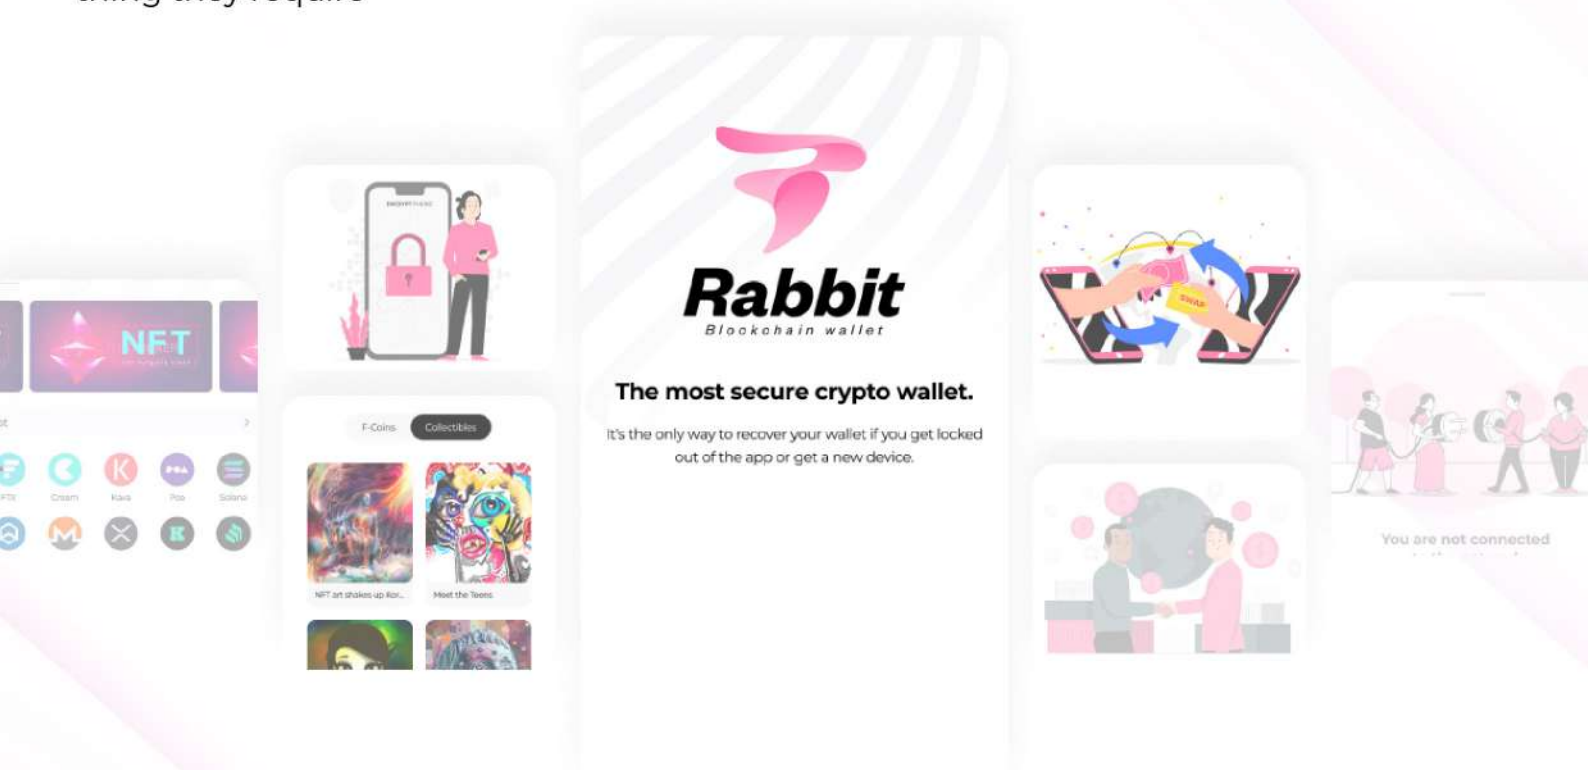

Our Mission

The mission of Rabbit wallet is to provide users with simple, convenient, and highly secure solutions in the world of Cryptocurrency

Product

Rabbit Wallet is designed to be the next generation of decentralized multi-utility wallet applications. And designed to provide users with an excellent experience, with a simple and intuitive interface that is user-friendly. Utilities designed to provide users with everything they require

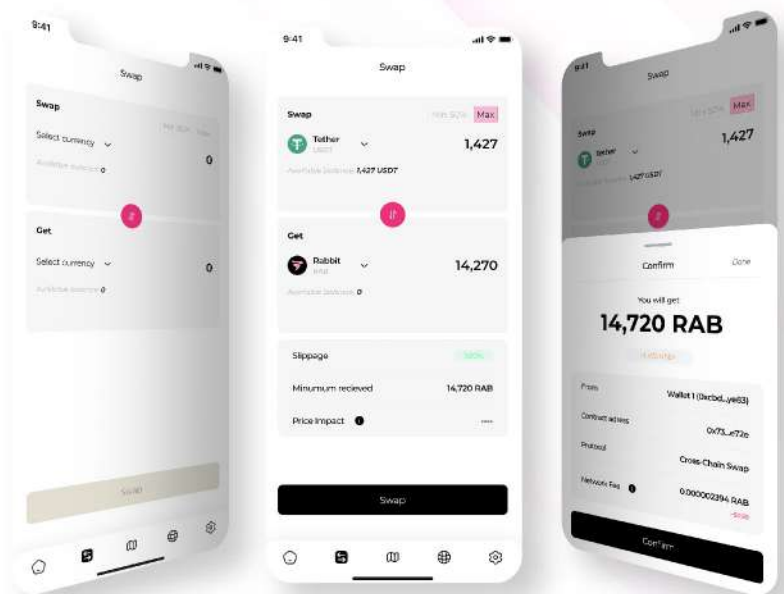

- Storage of assets using private keys ensures a high level of security and reputation
- Easy accessibility and anonymity for transactions anytime, anywhere
- Trade over one million tokens across fourteen leading blockchains
- Automatically switch preferred Blockchain without user input
- Connect to a number of DApps
- Passive Income through Staking
- Daily breaking news and market strategies
- Track real-time charts and prices for each token
- Participate in Airdrops and IDOs from the leading projects
- Purchase Tokens directly through Visa and Mastercard
- Rewards from an affiliate referral program.

Swap

Rabbit Swap is an automated marketplace that enables users to exchange over **3000 tokens** across multiple chains, such as **Ethereum, BNB Smart Chain, Opimism, and others.**

Users enjoy the best Swap prices on Rabbit thanks to the most advanced auto-update technology among DEXs

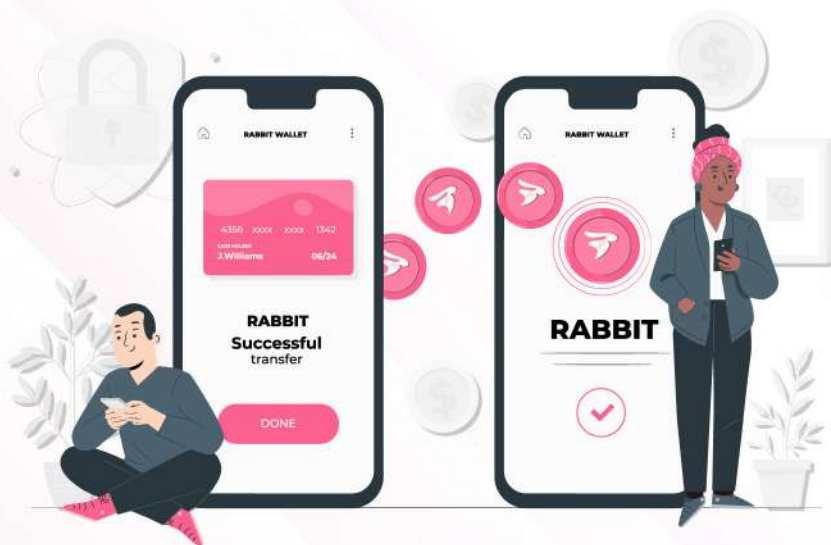

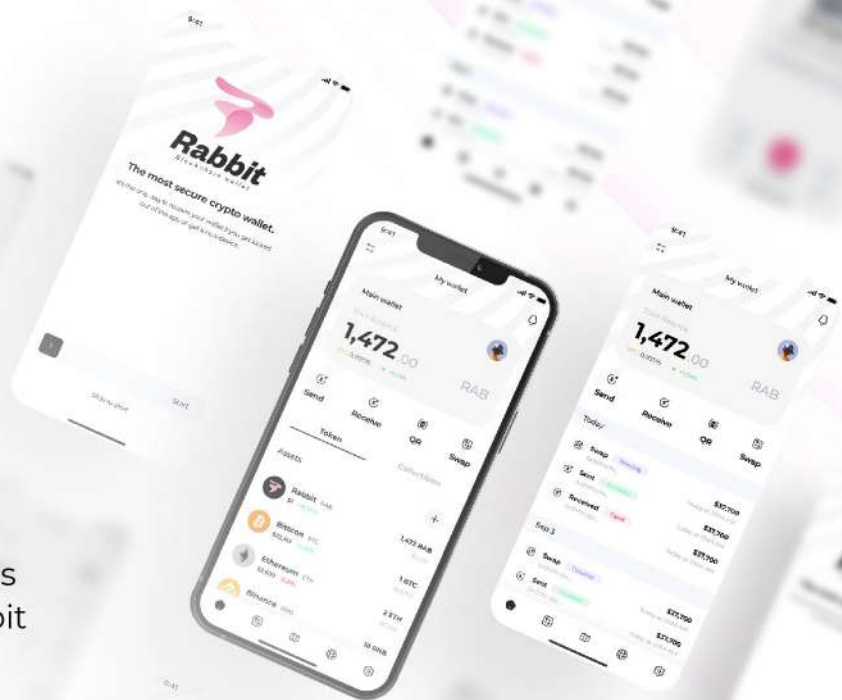

NFTs

View your NFTs with ease, share them on social media, and gain insight into their rare traits.

Multiple formats of NFTs on multiple blockchains are supported

Browse DApps

Discover the most popular DApps without difficulty using the Rabbit wallet.

Connect, Swap, Farm, and mine without difficulty on the leading DeFi protocols

Send

Send cryptocurrency with the confirmation speed and network fees that the user prefers.

Provides users with real-time gas price and transaction speed updates

News

MarketPlace

Event

Market Strategy

Launchpad

Staking

News

Every day, users are provided with market news and information about Rabbit wallet events. Accurate information from Rabbit enables users to seize opportunities, make prudent investment decisions, and produce excellent results expeditiously

Event

Rabbit Events allow users to have fun and earn excellent rewards. In the future, Rabbit will integrate Learn to Earn into the Event.

This utility enables project developers to share educational information about their projects, while the community receives rewards from project developers. project development

Staking

Even while sleeping, users can earn passively. Staking makes activist assets profitable with interest rates as high as 39 percent annual percentage rate (APR). According to their individual investment preferences, users can view, search, and select various APY staking programs.

In the future, project owners will be able to create Staking programs on the Rabbit wallet to utilize external resources to participate in network operation through Nodes and distribute rewards to Staking users

Launchpad

Rabbit Launchpad is the bridge for the most powerful outreach projects. Potential project developers can create their own Token sale rounds on Rabbit wallet to raise capital and increase the project's reach to Rabbit's users.

Rabbit Launchpad is more than just a token sale platform. It is also a complete consulting service for projects, from the knowledge and experience of the Rabbit team. Participating in Rabbit Launchpad, projects can focus their efforts on what matters most: product development and usability enhancement.

Rabbit Launchpad creates a safe environment to help users as investors get early access to excellent and potential new projects and buy tokens at a lower price when released, bringing high returns to investors

Airdrop

Rabbit Airdrop is a platform for developers to advertise their projects to the Rabbit community.

By performing tasks that contribute to the promotion of a project, Rabbit users are eligible to receive free tokens or non-fungible tokens (NFTs)

MarketPlace

Rabbit MarketPlace is a platform that aids in the launch and sale of INO rounds. Individual users can additionally list their own NFTs and trade, buy, sell, or trade their NFT collections.

The Rabbit MarketPlace also assists users in purchasing their desired NFTs at the lowest price, with the quickest and safest transaction

Market Strategy

Rabbit provides users with daily cryptocurrency market strategies from leading experts. This feature assists users in accurately identifying market trends, thereby enhancing their decision-making efficiency

Referral Program

Rabbit provides users with free rewards for sharing its utility with the community

Security

Security is and will always be Rabbit's top priority.

We believe that data security and privacy are essential for establishing user confidence.

We invest heavily in ongoing security and privacy awareness training for all employees to bolster our security posture. Your Rabbit Wallet is encrypted locally on your device and biometrically secured.

To test our core Blockchain systems, Rabbit has also hired internationally renowned security auditing and consulting firms, such as SOLIDProof.

Rabbit Bug Bounty - Rabbit recognizes the vital role that security researchers play in maintaining the safety of our community. Through our external bug bounty program on the leading platform, Rabbit Bug Bounty, we encourage responsible disclosure of security vulnerabilities

Tokenomics

RABBIT Token

Token name: RABBIT
**Token Symbol:** RAB
Token type: Utility & Governance
Total supply: 100,000,000 RAB

Max supply: 100,000,000 RAB
Blockchain network: BNB Smart Chain (BEP20)
& Arbitrum (ETH)
Token Decimal: 18

Community

Reserve Funding
2%

Token Use Cases

The Rabbit wallet project's utility and governance token is the RABBIT token

Projects use RAB Token to pay 30% of Airdrop and **Launchpad** service fees

RAB holders are eligible to participate in **Airdrop and Launchpad** programs from Rabbit's partner projects

Users must hold RAB in order to submit proposals, cast votes, and manage projects within the Rabbit ecosystem

Users hold RAB in order to generate passive income via **Staking RABBIT**

Users who hold RAB in the future will receive a trading discount on **DEX RABBIT**

RAB is used to participate in **RABBIT Marketplace NFT** purchases

Rabbit plans to Burn in quarterly. Rabbit will use 40% profit from the wallet to buy $RAB on the market and Burn. The Burn will be on the 10th of the first month in each new quarter starting when the RABBIT wallet is profitable
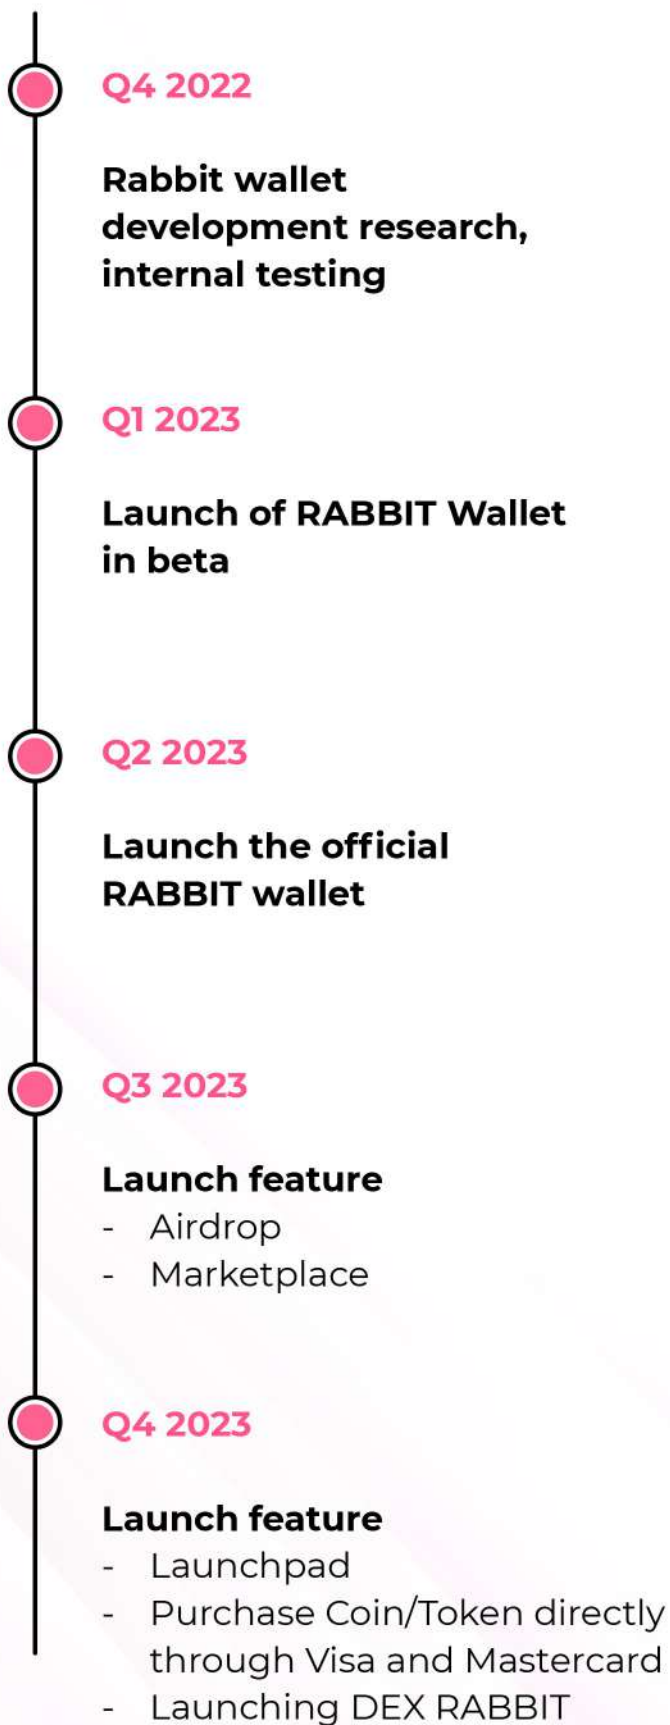

Emission & Distribution

Category	Allocation	Description	Vesting
Community	55% of max supply	The worldwide community of users holds the majority of the max supply of RAB Token to vote and recommend features, in-app updates, and other important changes	Already distributed to users globally
Liquidity Pool	7% of max supply	Used to add to the liquidity pool on a decentralized exchange (DEX). In which, BSC network accounts for 6% and Arbitrum accounts for 1% of the max supply.	Locked for 5 years
Reserve Funding	2%of max supply	Used to meet any future expenses or financial obligations, especially unexpected arises.	Distributed when needed and when unexpected arises
Burn	36% of max supply	All 36% of RAB in max supply has been burned (including 21,6% of Team and 14,4% of Ecosystem). RABBIT team will mint 1,000,000 RAB monthly until the max supply of 100,000,000 RAB is reached and distributed proportionally: ● 600,000 RAB for Team is allocated to the company's operations each month to invest in R&D and Marketing departments. ● 400,000 RAB for Ecosytem allocated to reward the wallet's ecosystem including Staking rewards and other incentives for users.	Mined and distributed monthly for 36 months from the time of TGE+1

Roadmap

Q4 2022

**Rabbit wallet
development research,
internal testing**

Q1 2023

**Launch of RABBIT Wallet
in beta**

Q2 2023

**Launch the official
RABBIT wallet**

Q3 2023

Launch feature
- Airdrop
- Marketplace

Q4 2023

Launch feature
- Launchpad
- Purchase Coin/Token directly
  through Visa and Mastercard
- Launching DEX RABBIT

Disclaimers

The Rabbit team has published and made available the Whitepaper Rabbit. This whitepaper's objective is to inform readers about the Rabbit project so that they may decide for themselves whether or not to proceed with the purchase of Rabbit Tokens ("RAB"). This whitepaper does not represent an offer to buy, sell, or exchange any tokens, shares, securities, or other assets.

For any representations made in this whitepaper, Rabbit has taken effort to ensure that, as of the date of publishing, the information contained herein is accurate to the best of our knowledge and that no additional fact, if omitted, would be misleading.

After that date, no representation, warranty, guarantee, or undertaking is provided about its continuous correctness. Without giving the user prior warning, the content in this whitepaper may be updated, supplemented, or changed at any moment.

In relation to the correctness, dependability, or completeness of any information given here, Rabbit makes no warranties and disclaims all duty.

Prospective purchasers of RAB shall conduct their own due diligence. It is the sole responsibility of prospective RAB buyers to make sure they agree to all provisions of this Whitepaper and the Terms. The purchase of RABBIT may come with unique dangers that could cause the loss of the entire or a sizable portion of the buying price.

Also, you must only buy RAB for use on our site; you must not buy it for investment or speculation. Unless you completely comprehend Rabbit's nature, the risks associated with purchasing RAB, and accept those risks
